EXPERIENCE

Senior Web Application Developer

Goto.Health

📅 01/2022 - 12/2023   📍 Turkey-Australia-Remote

platform that allows consumers to find, book and pay for allied health professional services quickly and effortlessly

- As the Senior Web App Developer at Goto.health, I spearheaded the evolution of an innovative appointment booking platform in Australia. My leadership focused on seamless integrations with major practice management systems, enabling instant, real-time confirmations for nationwide health practitioner appointments. Prioritizing user-centric scheduling and transparent pricing, I led a diverse team in devising innovative solutions that reshaped the booking model. My role also included ensuring platform robustness through comprehensive code reviews and implementing enhancements for improved efficiency and scalability across the system

Web Programmer

CodeMerx

📅 06/2021 - 11/2021   📍 Turkey-Bulgaria-Remote

CodeMerx brings to your team the expertise behind JustDecompile, Fiddler Everywhere, NativeScript and many other tools used by millions of developers on daily basis.

- At CodeMerx as a Web Programmer, I collaborated with a skilled team specializing in developer tools like JustDecompile, Fiddler Everywhere, and NativeScript. Leveraging .NET Core, React.js, C#, ASP.NET Core, and microservices, I contributed to innovative solutions. Remote work from Sofia, Bulgaria allowed close collaboration with experts, utilizing Git and web development methodologies to enhance projects. My focus was on crafting engaging user interfaces with React.js, ensuring seamless user experiences for CodeMerx's tools.

Web Developer

MeduNet

📅 11/2019   📍 Turkey-Saudi Arabia-Remote

pioneer in the field of Information Technology and Communications

- At MeduNet, I led the delivery of sophisticated solutions using cutting-edge technologies, contributing to projects for both government and private sectors. With expertise in .NET Core, ASP.NET MVC, C#, and Oracle Database, I played a key role in crafting high-quality, client-aligned solutions across a 23-year span. Collaborating with diverse teams, I ensured excellence throughout the software development lifecycle, specializing in custom software using ASP.NET MVC and .NET Framework.

Back End Developer

Jungle Bird

📅 01/2019 - 11/2019   📍 Syria

- At JUNGLE BIRD, as a Back End Developer, I specialized in ASP.NET solutions, contributing globally to platforms like nopCommerce and GrandNode. Using .NET Core, C#, ASP.NET Web API, and MongoDB, I designed efficient e-commerce solutions. My focus centered on seamless integration, robust data handling, and optimizing backend functionalities. Collaborating across teams, I enhanced product leveraging and business efficiency, staying abreast of platform trends to exceed customer expectations. My tenure emphasized ASP.NET-driven e-commerce solutions, emphasizing scalability and customization

Backend Developer

Health In Touch

📅 01/2018 - 01/2019   📍 Syria-UAE-Remote

- At Health in Touch, I developed multi-platform solutions using ASP.NET MVC, SQL Server, and JavaScript. I focused on creating seamless connections within the healthcare landscape, architecting functionalities, optimizing databases, and integrating dynamic front-end elements. My role contributed to simplifying access to medical and health services through a user-friendly interface.

SUMMARY

- I am a Senior Web Application Developer With a Bachelor's degree in Information Technology from Aleppo University, I have a strong foundation in web development and a passion for creating impactful web solutions.

At Goto.Health, I spearheaded the evolution of the appointment booking platform, integrating it with major practice management platforms in Australia and ensuring instant confirmation and reliability for users. I also enhanced the platform's functionality, user-centricity, and security, leveraging my expertise in .NET Core, C#, ASP.NET Core, and e-commerce platforms like nopCommerce. I collaborated closely with a diverse team, strategizing and implementing innovative solutions that flipped the conventional booking model on its head.

I have a proven track record of delivering high-quality web applications, having previously worked with CodeMerx, a renowned company that develops some of the most widely-used developer tools. There, I contributed to projects that shaped the tools utilized by millions of developers worldwide, using .NET Core, React.js, and microservices.

At MeduNet, I led the delivery of sophisticated solutions using cutting-edge technologies, contributing to projects for both government and private sectors. With expertise in ASP.NET MVC, C#, and Oracle Database, I played a key role in crafting high-quality, client-aligned solutions. Collaborating with diverse teams, I ensured excellence throughout the software development lifecycle

I am always eager to learn new skills, tackle new challenges, and transform ideas into digital reality. I take pride in my work and value collaboration, creativity, and customer satisfaction. I am looking forward to connecting with like-minded professionals and exploring new opportunities to create exceptional web solutions that leave a lasting mark.
